SKILLS

- Arduino
- Github
- HTML5
- iOS Development
- Leadership
- Microsoft Word
- Python
- Robotics
- Swift
- Wireframing
- P5
- API
- OAuth

CODING LANGUAGES

- Python
- Swift
- HTML
- CSS
- Javascript
- Java

Emlert — *Emergency App*

Using the language Swift I developed an iOS app that would alert civilians to the presence of predators around them. Also the app allowed civilians to report any suspicious acts that they witness. App was developed in collaboration with a partner.

Kite Learning— *Immigrant resource website*

While attending, PennApps, my team and I created a site where any immigrant could go access at either their local library or from their home and learn about what it takes to live the "American dream". Our website allowed many immigrants to learn a numerous amount of things whether it was from gaining citizenship or even applying for a job.
